The DragonFly

Slide can be built to fit your existing rails

Also available in single or three phase electric or hydraulic drive units

The "DragonFly" is designed to open railcar doors without the danger of physical stress to the operator.

This custom made Pneumatic operated Railcar Door Opener mounts on a 6x6 I beam to roll smoothly on harden rollers.

The "DragonFly" has a telescoping shaft with one flexible joint for ease of movement.

This unit employees a 2hp air motor and a planetary gear, and comes equipped with a lubricator, filter, and 3/4 inch piping

The "DragonFly" uses a 3/4" hose at 80 psi for maximum power.
