Dragon
Railcar Door Opener

The Dragon is a pneumatic powered railcar gate door opener. This opener uses an air motor and a non-impacting planetary gear reducer for low noise and low maintenance at a safe operating speed of 8 rpm. The gear reducer is designed for a life time of operation. This unit will develop 1800 ft. lbs. of torque with the delivery of 70 cfm of air at 90 psi.

The Dragon comes equipped with a lubricator, air filter and 3/4 inch piping. The muffler is out of the way and the exhaust is dispersed for safe and low noise operation.
