

Portable Plug Door Opener Freight Door Opener

Door Demon[®]

Portable Plug Door Opener in Action

Introducing our new **Door Demon[®] Portable Plug Door Opener**. The Portable Plug Door Opener is a stand-alone unit designed to meet your needs where a forklift mounted unit does not fit. This design features safety, mobility, and adjustability in a compact and stable platform. This Door Demon[®] is small enough to store anywhere yet durable enough to remove the violence and hardship out of opening even the toughest, most damaged plug doors.

The **Door Demon[®] Portable Plug Door Opener** opens plug doors from a stable platform in a predictable fashion that is non-violent (handles stored energy from the recoil in the door's handle in a safe manner) to any worker thereby keeping the operator out of danger of door. Also, since the unit sits away from the freight car plug door, the operator is not prone to falling (in dock environments).

Key Features:

- ◆ Hydraulic Powered via DC Batteries
- ◆ Smart Charger Included On-Board
- ◆ Adjustable Head for Reaching Dock to Freight Car
- ◆ Easy Manual Height Adjustment
- ◆ Locking Wheel Brake to Keep Unit from Moving when Parked or in Use
- ◆ Portable
- ◆ Accessible
- ◆ Safe, Single Person Operation
- ◆ Affordably Priced
- ◆ Predictable Performance
- ◆ Stable
